Art Unit: 1731

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-11, 14-16, 18-27, and 30 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The originally filed specification does not provide for exposing the solid body at a temperature in the claimed range of substantially higher than 105 degrees Fahrenheit. The specification only notes a temperature of 700 degrees Celsius, 1292 degrees Fahrenheit, which does not provide support for any temperature substantially higher than 105 degrees Fahrenheit, such as 500 or 600 degrees Fahrenheit as instantly encompassed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16, 18-29, 31-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase used in step c to refer to

Art Unit: 1731

the ceramic body makes it unclear to which ceramic body it is referring. Is it the ceramic body that was treated after step a or step b?

For examination purposes, the solid body referred in step c will be read as referring to the either solid body resulting from step a or b.

***Information Disclosure Statement***

Applicant is invited to submit the noted abstracts in IDS form.

If applicant considers that the submission of the abstracts is an IDS, please note the following.

The information disclosure fails to provide the required following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

***Allowable Subject Matter***

Claims 12-13,28-29 and 31-33 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1<sup>st</sup> and 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the cited prior art fails to disclose or reasonably suggest a method of making a ceramic body comprising the claimed compressing and sintering in combination with heat treating the ceramic body at the claimed temperature. The cited prior art only discloses humidification of the ceramic body at a temperature of 74 °F to 104 °F, see Avery Table I.

***Response to Arguments***

Applicant's arguments filed 12/26/06 have been fully considered but they are not persuasive. Applicant's argument against the 112 2<sup>nd</sup> paragraph rejection does not remove the above noted ambiguity in the claimed invention. The phrase used in step c to refer to the ceramic body makes it unclear to which ceramic body it is referring. Is it the ceramic body that was treated after step a or step b?

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1731

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
